New Screen Magazine

No. 46

- *The Reel*

CHARLES H. CLARK, a New York inventor, has aroused much scientific interest by his discovery of a fact that a canoist can follow the waves of a ferry boat for miles without paddling. The secret is to keep the canoe on the forward slope of a wave licked up by the paddle wheel just ahead. Cinema Luke, the human cartoon, has a fight with Leslie Elton his creator. A new feature is introduced in this issue of the New Screen Magazine. It is called "Letterlaughs," being some excerpts from letters written to prominent physicians by illiterate persons. We have an interview with Mr. Hudson Maxim, the world famous inventor for making engines of war as well as paraphernalia of peace. He has invented among other things, Smokeless powder, which will burn under water. A futurist movie of Senator Hiram Johnson puts a final touch to this issue.
